WATERMELON YEAR 2027

Fresh from Panama: Quality Beyond Borders

At Agroexotic Fruits Panamá, we believe excellence begins with the seed. Every watermelon and melon we produce reflects our team's commitment to quality, freshness, and professionalism at every stage of the process.

Panama's privileged climate and fertile soils, combined with our experience and export vision, allow us to deliver sweet, juicy, and consistent seedless watermelon, seeded watermelon, and yellow honeydew melon, grown to meet the demanding standards of the European market.

Our promise is simple: to plant trust, harvest quality, and export the very best of Panama to the world.

About Agroexotic Fruits Panama

Agroexotic Fruits Panamá, S.A.T. grows and exports watermelon and melon from El Roble de Aguadulce, Panama.

We farm around 70 hectares of open field and operate our own packing house, which lets us control quality from harvest to container. Our window runs January to April, Panama's counter-season to European production, when supply from the Mediterranean is at its lowest.

Every season we select our varieties around two things: what the market is asking for, and what our growing conditions can deliver at the highest quality. We also work to bring new melon and watermelon varieties to our customers, testing them under our own conditions before they enter our programme.

The company was founded in 2024 by a team with long experience in Panamanian export horticulture, and shipped its first containers to Europe in 2026.

We are GlobalG.A.P. certified.

Rotterdam · Algeciras · Antwerp · London

ALON

Seedless (triploid) · Round · Whole fruit
Origin: Panama
Availability: W4 – W12 (shipping weeks)
GLOBALG.A.P. GGN 4069453515673

Weight: ≈4–6 kg
Shape: Round
Rind: Very dark stripes
Flesh: Deep red, very firm, high lycopene
Brix: min. 10°Bx

Packaging: Carton: 16 kg (min. 15 kg) · ≈4–6 fruits
Pallet: 60-66 cartons (1000x1200mm)
Sea freight to any European port on request

CRISP DELIGHT

Seedless (triploid) · Allsweet · Fresh-cut & processing.
Origin: Panama
Availability: W4 – W12 (shipping weeks)
GLOBALG.A.P. · GGN 4069453515673

Weight: ≈6-7 kg
Shape: Blocky-oval
Rind: Dark green with medium Crimson stripe. Clear rind-to-flesh definition · low purge
Flesh: Deep red, extra firm, small pips
Brix: min. 10°Bx

Packaging: Bulk bins (standard) · Carton: 16 kg (min. 15 kg) · ≈2–3 fruits
Pallet: 6 bins or 60-66 cartons (1000x1200mm)
Sea freight to any European port on request

CYGNUS

Seedless (triploid) · Crimson Sweet · Personal size
Origin: Panama
Availability: W4 – W12 (shipping weeks)
GLOBALG.A.P. GGN 4069453515673

Weight: ≈3.3 kg
Shape: Globe
Rind: Crimson Sweet, medium-thick – export grade
Flesh: Red, firm
Brix: min. 10°Bx

Packaging: Carton: 16 kg (min. 15 kg) · ≈4–6 fruits
Pallet: 60-66 cartons (1000x1200mm)
Sea freight to any European port on request

PROMESA

Seedless (triploid) · Round · Whole fruit · Personal size
Origin: Panama
Availability: W4 – W12 (shipping weeks)
GLOBALG.A.P. GGN 4069453515673

Weight: ≈2.6–3.1 kg
Shape: Round
Rind: Dark stripes
Flesh: Deep red, very firm · very sweet
Brix: min. 10°Bx

Packaging: Carton: 16 kg (min. 15 kg) · ≈4–6 fruits
Pallet: 60-66 cartons (1000x1200mm)
Sea freight to any European port on request

PELEG

Micro-seeded · Round-to-slightly-oval · Whole fruit
Origin: Panama
Availability: W2 – W12 (shipping weeks)
GLOBALG.A.P. GGN 4069453515673

Weight: ≈5–7 kg
Shape: Round to slightly oval
Rind: Green with stripes
Flesh: Deep red · micro seeds (soft, edible)
Brix: min. 10°Bx

Packaging: Carton: 16 kg (min. 15 kg) · ≈4–6 fruits
Pallet: 60-66 cartons (1000x1200mm)
Sea freight to any European port on request

YELLOW HONEY DEW

Yellow melon (Amarillo / Canary type) · Whole fruit
Origin: Panama
Availability: W2 – W12 (shipping weeks)
GLOBALG.A.P. GGN 4069453515673

Weight: ≈1.5–2 kg
Shape: Round-oval · smooth, firm rind
Rind: Bright golden yellow
Flesh: White-greenish, firm and crisp
Brix: min. 11°Bx

Packaging: Carton: 10 kg (min. 9.5 kg) · ≈4–8 fruits
Pallet: 91-98 cartons (1000x1200mm)
Sea freight to any European port on request

Testing tomorrow's varieties

Every season we look for varieties that can do better: better flavour, better shelf life, better performance under our growing conditions in Panama.

This year we are running field trials with two new varieties from Enza Zaden: Cracker Jack, a seedless crimson watermelon, and Konquista, a sutured cantaloupe melon. We are testing them under our own conditions and following them all the way through the chain, with particular attention to how the fruit arrives at destination.

Varieties that meet our standard will join our export programme for the following season. We would rather test first and commit later. If you are interested in either of these varieties, talk to us, we will share the trial results when we have them.

KONQUISTA

Cantaloupe, sutured
Under field trial: Panama, 2027 season

Brix: 13–16
Flesh: Orange · very good flavour
Plant: Strong, cracking tolerant
Post-harvest: Outstanding shelf life

Weight, size and packing: to be defined after trial results

CRACKER JACK

Seedless (triploid), Crimson
Under field trial: Panama, 2027 season

Weight: ≈4kg
Shape: Blocky-oval
Rind: Dark crimson stripe
Flesh: Deep red, firm, small pips
Brix: 12–13

Weight, size and packing: to be defined after trial results
